

Breaking New Grounds

MEES has nearly 30 exclusive agencies for Oman, and all of them are pioneers in their respective fields

Middle East Engineering Solutions LLC (MEES) exemplifies the success of a true enterprise starting from the visionary acumen to breaking newer grounds and excelling at every given instance, from the project conception to execution. Having proven time and again, it has emerged as one of the most trusted companies in Oman in the field for its stringent quality standards, and timely and reliable service. The company celebrated its 11th anniversary recently.

Recounting the company's growth and extraordinary performance, K G Muralidharan, managing director says, "Our staff is our strength and they have been trained and augmented substantially to give timely and effective service. As a team, we have executed a range of prestigious and critical projects in the region".

Being an ISO certified company specifically for the installation of acoustics and vibration isolation solutions, and also awarded thrice by the Dossier magazine, the company is run by engineering professionals with more than 20 years of experience. MEES has gained the trust from most of the clients, consultants and the contractors, and their foot print in various

segments is prominent.

MEES has nearly 30 exclusive agencies for Oman, and all of them pioneers in their respective fields. It has given added strength to the company, carrying their experience and knowledge into the market, along with their timely and quality service, to the advantage of the end user.

Their activities/solutions ranges from

- Air-Conditioning – Split units, Package units, Air Handling units, Fan coil units etc.....
- Ventilation – Smoke fans, Car park ventilation fans, Kitchen fans, Twin Fans... etc.
- Air control - Dampers , vav's , Fire dampers ...etc.
- Air Distribution – Grilles & Diffusers, Jet nozzles, displacement diffusers .. etc.
- Water flow – water supply pumps, Waste & Sewage Pumps, ... etc.
- Water control – PICV valves, FCU valve packages, Gate valves etc...
- Filtration Systems – Industrial Filtration, Carbon filters etc..
- Acoustics – Auditorium Acoustics, Wooden/ Fabric finish panels , Sound Attenuators,etc
- Vibration Isolation – Springs, Hangers, Floating floors, Inertia Bases , Flexible connectors etc.
- Piping – Acoustic Drainage pipes, PPR, UPVC, Fire rated pipes etc...
- Ducting – Spiral ducts, Fire rated Duct works..etc.
- Insulation – Fibre Glass, Rockwool, Foam insulations..etc.
- Liquid Thermal Insulation , Anti Rust coatings and so on
- Disinfection solutions – Plasma Solutions
- Automation – Access control, Gate motors, Boom barriers and so on
